To Whom It May Concern,

Recently , we at Crusader Boats, were called upon to fix a fuel problem on a 6 year old boat. A twin engine boat with two fuel tanks. One engine/tank was running fine , the other was running poorly. Upon examination it was found that an ALGAE-X unit had been installed on the good tank. A second unit was installed on the other tank and no further problems have been recorded.

Since that time an ALGAE-X was installed on a 10 year old vessel with sludge in the fuel tanks. The fuel has now cleared up, and the engine performance and efficiency has increased.

Crusader Boats now install ALGAE-X on all the new boats we build.

Sincerely,

Andy Grant, President
Grant's Fiberglassing, Inc.
