ALGAE-X International
P.O. Box 4011
Ft. Myers Beach, FL 33932

March 10, 1999

Dear Bill,

Just wanted to drop you a line to let you know how satisfied we are here at the James River Reserve Fleet with your ALGAE-X Magnetic Fuel Conditioner product. Reflecting over the past two years of installing your product in our tugboats, patrol boats, personnel carrier boats, power boats, crane barge, and other marine diesel industrial equipment, it is a noteworthy pleasure to confirm the positive impact it has made on our overall operations.

Prior to installing your product, we had numerous fuel related problems with biological growth in our service and storage tanks causing us to go through large quantities of fuel filters, injectors and nozzles, and problems with turbo-chargers and exhaust Systems due to our diesel engines not burning clean fuel.

After installing your ALGAE-X Magnetic Fuel Conditioner units in our Fleet equipment, our repair mechanics and craft engineers are very happy and well satisfied. We have significantly reduced equipment downtime, repairs and maintenance, labor costs and hours, parts and material costs since our fuel Systems and engines are operating so much cleaner.

Thanks so much for your ongoing support and service, it is greatly appreciated. Looking forward to doing business with you and your company in the near future.

Sincerely,

Randall D. Goldman
