Re: Algae-x

Ernie:

I would like to thank you for the Algae-x magnetic fuel conditioners.

I installed these the week before the Big Rock Tournament. Prior to installing these I was changing my 30 Micron filters every 35 to 50 hours. My fuel restriction guage would reach 7" of vacuum between those hours.

I now have been able to use 10 Micron filters in my racors and get between 125 and 150 hours and the fuel restriction has not reached above 5" of vacuum.

Before installing these, my filters would get charcoal black in 35 to 50 hours and now when I reach 150 hours the filter is reddish brown.
