Suite 18  
P.O. Box 4011  
Ft. Meyers Beach, FL 33932

Attn: Mr. Bill O'Connell

Dear Bill:

Eco Sound, Inc. tested an Algae-X unit on a marine fork lift from October 1999 to November 1999. The fork lift used had a Caterpillar 3208 diesel engine. As a result of the installation, of the Algae-X, we had a reduction of up to 50% in the exhaust opacity throughout the entire RPM range. The testing was performed by using a Wager Model #6500 portable smoke meter.

Should you have any questions, or need further information, please do not hesitate to contact me.

Sincerely,

Michael A. Reardon *MR*
