Re: Algae-X OEM for Far Horizon Yachts™

Dear Bill,

I am pleased to advise you that we have selected the Algae-X filtration system as OEM on our yacht vessels. We believe that given the endurance of our small ships that we need to take every precaution with the fuel quality for the machinery system and it only makes sense that we address the microbial problem as seriously as we do the water separation units. As I mentioned, we will put the Algae-X in line forward of the Racor Duplex system that will also be OEM on our vessels.

Let me make a personal statement. You and I don't go back very far but we have come a long way in that short time. Not only is Algae-X a superior product, in our estimation, a major part of our selection has been the fine sales and support work that you have done. It truly separates Algae-X from the competition.

I will get back to you with more details on the model number, size of fuel line, etc. shortly.

Yours very truly,

William Berlin,  
President
