Algae-X International
P.O. Box 4011
Fort Myers Beach, FL 33932

Attention: William O'Connell
Vice-President

Dear Bill:

The principals of Gaski Boats International have been involved in the boat building business in Canada for the past 5 years. Our associates and the designer of our hull, Motun hf of Iceland, have been designing and building high-speed fiberglass fishing boats since 1977. The export market for the Gaski is strong. During the past several years, in addition to our Canadian sales, we have sold boats to Saipan, United States, St. Pierre et Miquelon, Israel, Trinidad and Iceland. We have had potential sales as far away as Turkey.

The Algae-X fuel decontamination system is extremely exciting and we are "spec'ing" the system into all of our finished boats. We are very proud of our Gaski boat. She is an efficient, stable, advanced technology, high-speed boat. Products, such as Algae-X, which can enhance the performance even further are a welcome addition.

Watch for an update in the near future!

Yours sincerely,

A handwritten signature in cursive script that reads "Sandra F. Chandler".

S.F. Chandler
President

There have always been boats..... now there is Gaski
