Subject: Algae-x magnets and fuel catalyst

Bill . . . thanks very much for all your help in solving my algae fuel tank problems on my 46 Post . . . as you know I could barely run the boat 10 hours this past spring without clogging up my filters . . . my engines . . . Detroit 671's were starving for fuel and my filters were a slimy mess . . . what a difference the Algae-X magnets made! I installed the magnets on both tanks and changed the old filters to the double Racors and used your fuel catalyst product to kill the algae . . . I stopped using Biobor which really didn't work and use your catalyst and magnets exclusively . . . my boat has never run better . . . I am getting 21 knots out of the boat and my filters are so clean they look like a bottle of good red wine . . . thanks for the new technology and the peace of mind . . . I am running my boat offshore with complete confidence and I am having more fun . . . best regards,

Gordy Sulcer
