Subject: results

I was amazed by the almost instant improvement we experienced with the installation of your units. We did not install them till we got down to Florida with the boat. On the way down we picked up a batch of really dirty fuel. The entire boat was covered with black soot. We topped off our tanks in Florida and installed the units. I just got back from a Bahamas trip and the transome soot was 50% of what it used to be even with clean fuel!!! This is even with a partial tank of the bad fuel we picked up coming south. We had not even put in the fuel catalyst yet. Bottom line is your product works great.
