Subject: Use of Algae-X

Bill.....We currently own a 1999 50' Carver motor yacht with Cummins 450 C-series engines along with a 15kw Kohler genset. We have used the Algae-X for over 3 years and the results are tremendous. Seeing is believing. We have never added bio-guard or any other fuel additive and the Racor filters have always stayed clear without any of the black residue build-up.

We are currently purchasing the Carver 570 Voyager, with Cummins QSM-11, 660hp engines and you can rest assured that the Algae-Xs will be on both mains and genset at delivery. People that say this is marketing hype have never used them nor witnessed the results. Come by our boat anytime and see the results. Thanks for a great product!
