December 20, 1996

Bill,

They really do work! Just like advertised! I thought they would, but some of my co-workers, who have studied microbiology more recently than I have were very doubtful. We installed some Algae-X 1000's on a 53' Hatteras with twin Detroit 8-71's. This boat had a significant fuel contamination problem and the Racor 1000 fuel filters were getting plugged in as little as 50 hours of operation. We installed the Algae-X units, and after only about 20 hours of motoring the fuel and filters look as clean as when new. Both the owner and myself are extremely satisfied.

Sincerely,

Steve Danaher

owner P.M.E.

We are almost out of LG-X's, and would like to order:

5	LG-X 100
1	LG-X 400
