Max Givan,

At this time I would like to thank your company ALGAE-X for helping us out in a very trying situation. We are the manager for the harbors of the Chlcago Park District in the City of Chicago. We have 7 tender boats that service Monroe Street Harbor which have diesel engines in them, these vessels are running 12 to 24 hours per day seven days a week.

For the last 3 years we have had serious problems with fuel contamination, we were changing fuel filters every 2 to 3 days, it was crazy .We were told by boat yards that the fuel tanks had to come out and be cleaned. The cost of this would be In the thousands of dollars range.

I heard about your company through a marine trades magazine and the internet. I talked to your company and how your product works. I installed the ALGAE-X model 200 on all of our tenders and used the fuel conditioner. Within a week the problem went away. I have not changed fuel filters for the rest of the season. The aggravation factor and complaints went away. Thank you again for your product.

Sincerely,

Kirk Kleist
