Algae-X International Completes Expansion

Company Poised for Continued Growth Serving the Fuel Management Market

Fort Myers, FL (October 18, 2007) – Algae-X International today announced completion of a series of moves that position the company for further growth. Central to that strategy is the new 7,000 square foot Manufacturing & Office facility in the Billy Creek Commerce Park in Fort Myers, Florida.

The increased cost of fuel and worldwide interest in more efficient diesel operations with lower emissions has driven demand for Algae-X's broad range of Fuel Conditioning and Fuel Maintenance systems, necessitating the growth in corporate facilities.

“Our expanded manufacturing space will provide the capacity to continue our strong double-digit growth rate for several more years,” Algae-X President Bill O’Connell states, “and we’re tending to all of our critical systems and infrastructure to allow for the same. It’s an exciting time for us and we are looking forward to the future.”

About Algae-X International

Algae-X is the premier provider worldwide of Fuel Conditioning & Fuel Maintenance systems that dramatically increase engine uptime, performance, and fuel economy, all while reducing emissions. Algae-X's patented technologies, superior engineering and commitment to customer service have propelled it to a leadership position as it enables more efficient use of the world's non-renewable resources. Headquartered in Fort Myers, Florida, Algae-X is represented in 42 countries. Major clients include Union Pacific, Cummins, Detroit Diesel, and the US Army. More at www.Algae-X.net.
