Algae-X Announces its new STS-6000 Automated Fuel Filtration System

New Price/Performance Value Guarantying Fuel Quality for Small Diesel Fuel Storage Tanks

Fort Myers, FL (March 26, 2008) – Algae-X International announced the immediate worldwide availability of the newest model in its Automated Fuel Filtration Systems line. The STS-6000 guarantees optimal fuel quality and reliability for stored fuel environments like Emergency Generators at all times. Algae-X has established a new price point for a fully automated fuel treatment system at a \$5,995.00 entry price.

Fully automated, the STS-6000's Smart Filtration Controller is user-programmable to run at predetermined times, assuring appropriate tank-turnover to stabilize fuel and maintain it in optimal condition. The system prevents and eliminates fuel breakdown by removing water, sludge and tank sediment from stored fuel. It features Algae-X's patented fuel conditioning technology to reverse the natural fuel deterioration process. Like its brothers, the STS-6000 line includes a full scope of built-in UL-508A certified diagnostics, alarms and indicators for safe operation and remote monitoring.

“The market has been asking for economical fuel quality solutions that are reliable, redundant and simple yet versatile,” offered Christoph Tschegg, Vice President of Engineering at Algae-X, “and the entire STS line fits that bill, and now at a much lower entry point”.

About Algae-X International

Algae-X is the premier provider worldwide of Fuel Conditioning & Fuel Maintenance systems that reverse the fuel deterioration process and dramatically increase engine uptime and performance while reducing emissions. Algae-X's patented technologies, superior engineering and commitment to customer service have propelled it to a leadership position as it enables more efficient use of the world's non-renewable resources. Headquartered in Fort Myers, Florida, Algae-X is represented in 42 countries. Major clients include distributors for major engine manufacturers such as Cummins, Detroit Diesel, Caterpillar, the US Military, etc. For more information please visit: www.Algae-X.net
