

Press Release

For Immediate Release

Fort Myers, FL - July 12, 2007: Algae-X International introduces the TK-180 XT; a complete packaged fuel polishing system for re-circulating, cleaning and/or transferring diesel fuel and light oils. With a flow rate of 180 gallons per hour, the system efficiently removes water, sludge and sediments from diesel powered vessels, stand-by generators, trucks, buses and heavy equipment with up to 200 gallon (750 l) fuel tanks.

Portable, lightweight and operating on 12 volt DC power, the TK-180 XT is capable of being used almost anywhere. The system is simple to operate and packaged with all of the necessary components & accessories, so it's ready to go right out of the box. With a suggested retail price of \$949, it brings industrial style fuel polishing capabilities to the consumer.

Algae-X International manufactures a wide range of diesel fuel improvement products utilized in the industrial, power generation and marine industries.
