

ALGAE-X® Pressure Fine Filter Systems are a powerful addition to your Tank Cleaning & Filtering System. The FV series is molded from durable carbon steel, and provides large capacity, heavy-duty pre-screening for tank cleaning jobs with extraordinary amounts of sludge, rust scale, and other contaminants to protect your equipment.

- Cost Efficient Pre-Filtering
- Easy Connectivity & Filter Change
- Large Holding Capacity
- Variety of Filter Applications
- Variety of Micron Filter Options
- ASME Certification (Optional)

The filter connects to existing fuel storage systems utilizing 2" NPT or various flanged connections. The pressure filters are equipped with a vacuum gauge, shut-off and drain valves, as well as one inlet and one discharge pipe fitting that enables maximum flexibility when configuring system connections. The carbon steel molded filter housings use up to 8 filter cartridges to remove heavy particulate and sludge from 100 micron down to 1 micron, and a perforated, stainless strainer steel basket is easy to replace with the easy-open swing down lid.
