

TK 180-XT

Portable Tank Cleaning & Fuel Transfer System

Portable Tank Cleaning and Fuel Transfer Systems are used for re-circulating, polishing and transferring diesel fuel and light oils in boats, stand-by generators, trucks, buses, agricultural machinery and heavy equipment. They are compact, portable and easy to use. For marine applications, the TK 180-XT can be used in connection with the existing on board primary filter/water separator. Equipped with either a 12V DC or 24V DC motor, the TK 180-XT effectively removes water and sludge from the bottom of tanks straight to an appropriate waste receptacle.

TK systems are designed around a self priming 180 GPH brass gear pump. Quality filtration components are connected with corrosion resistant stainless steel plumbing. A pressure gauge is installed on the filter housing to ensure optimal filter usage. Filter elements include a stainless steel screen, particulate or water block.

TK 180-XT Accessories:

- AFC-705 Fuel Catalyst
- Fuel Sampling Pump Kit
- Microbial Contamination Testing Kit

Portable Tank Cleaning Systems feature:

- Compact and Designed for Portability
- Minimal Consumables Wasted
- Integrated Drip Tray
- Negligible Fuel Loss
- Low Operating Costs
- No Tank Entry Needed

TK 180-XT SPECIFICATIONS

Flow Rate	180 GPH
Filter	40, 80 mesh SS Screen or 10 μ Particulate or 15 μ Water Block
Fuel Conditioner	LG-X 500
Pump	Brass Gear Pump
Port Size	1/2"
Monitoring	Pressure Gauge
Power Requirements	12V 10A or 24V 5A
Clear Suction Hose	1/2"
Flexible High Pressure Discharge Hose	1/2"
Dimensions	14" x 13" x 4.25" (36 x 33 x 11 cm)
Weight	26 lbs
Not for use with fluids that have a flash point below 100°F.
